DINNER MEETING: Monday, March 22, 2010

“Using Our Coal & Biomass Wisely: Simultaneous Production of Electricity and Chemicals”

Scheduled Speaker

Dr. Herbert W. Cooper – President, Dynalitics Corp.

STUDENTS WITH CURRENT ID ARE FREE!

Electricity generating utilities and chemical manufacturers face two major challenges. The costs of their fuels and feedstocks are rising to unprecedented levels, and they are under increasing regulatory and social pressures to reduce carbon dioxide emissions. At this meeting our speaker will discuss a potential solution to both of these issues: gasify widely available low-cost coal, petroleum coke, or biomass, and use the resulting effluent stream to simultaneously produce electricity and chemicals.

Herbert Cooper is founder and President of Dynalitics Corp. For more than 40 years he has been involved in all aspects of developing multi-million dollar projects throughout the world, including process and equipment design, construction, operations, economic optimization and regulatory compliance. He holds both a Bs and MS in Chemical Engineering from City University of NY, and a doctorate in Engineering Science (chemical engineering) from Columbia University. He is active in AIChE and is currently Chair of the NY Metro Section, and is a member of ACS, NY Section.

The Russian Hall

4-6 Woodhull Ave
 Little Falls, NJ 07424
